

Top 10 Reasons to Choose Trustwave

1 We are a cybersecurity and managed security services leader.

Trustwave has more than 20 years of experience in cybersecurity. We offer managed security services, security testing, consulting, technologies and cybersecurity education.

2 Industry analysts recognize Trustwave as a global and regional leader in managed security services.

Gartner placed Trustwave in the Leaders quadrant in the 2018 Gartner "Magic Quadrant for Managed Security Services, Worldwide,"¹ a global report that assessed 17 of the industry's top managed security service providers.

IDC named Trustwave a leader in managed security services in the IDC MarketScape: Asia/Pacific Managed Security Services 2018,² as well as the IDC MarketScape: Canadian Security Services Providers, 2018 Vendor Assessment.³

3 You Get Follow-the-Threat™ Security Operations.

We deliver our services through a global network of 10 Advanced Security Operations Centers -- your mission control for cybersecurity. But instead of landing space shuttles, these global centers are staffed around the clock to monitor and immediately respond to security incidents that may be impacting your organization.

4 Trustwave SpiderLabs®, our elite security team, is on your side.

Our security breach investigations, threat hunters, malware reverse-engineering projects, millions of scans, thousands of penetration tests, leadership of open-source security projects and contributions to the security community have established Trustwave SpiderLabs as world-renowned experts on the past, present and future of security.

5 Our Trustwave SpiderLabs Fusion Center is a true industry game changer.

Our cybersecurity command center employs pioneering actionable threat intelligence to track threat actors, detect them with their clients, and instantly kill those threats inside an organization down to individual endpoints, a feat unprecedented in the managed security services industry.

6 We go way beyond the basics of cybersecurity.

Our Threat Detection & Response managed security and professional services help short-circuit an attacker's activities by detecting cybersecurity threats much earlier and then shutting them down before real damage is done.

Through our cyber range in Singapore, a hybrid between an advanced cyber range and an educational center, the Cyber Security Institute is a first-of-its-kind facility to test and train companies in dealing with sophisticated cyber threats.

7 We offer and manage the best of the best, industry-leading security technologies.

In addition to Trustwave technologies, we partner with other leaders in cybersecurity and provide security services to manage solutions from vendors such as Palo Alto Networks, Fortinet, Carbon Black, Splunk and many more. Our technology agnostic approach helps you get the best ROI from your technology investments.

8 Our channel partner program has a 5-Star rating in CRN's 2018 Partner Program Guide.

The 5-Star Partner Program Guide rating recognizes an elite subset of companies that offer solution providers the best partnering elements and training in their channel programs.

9 Customers in 96 countries rely on Trustwave for their cybersecurity needs.

Whether you're a bank, hotel chain, law firm or government agency, you're in good company with Trustwave. We tailor our services and your experience based on industry and needs.

10 More than 2,000 security-minded professionals back you up.

Our team is deployed across the globe to offer worldwide coverage with regional expertise.
