Trustwave Email Security for Office 365

OPTIMIZE EMAIL SECURITY, WHILE RIGHT-SIZING OFFICE 365 LICENSING COSTS

Benefits

- **Advanced Security:** Gain enhanced protection against business email compromise, phishing, blended and targeted threats from an industry leader

- **Data Protection:** Full data loss prevention (DLP) inspection on all outbound emails and attachments to help prevent data leakage and breaches of acceptable use policies – including Azure Rights Management (RMS) protected documents

- **Simplified Management:** Powerful, yet flexible policy engine adapts to dynamic business needs

- **Optimize Costs:** Layer Office 365 with industry-leading cloud email security and reduce per-user costs

Microsoft Office 365 has become the standard productivity platform in organizations around the world. It provides employees with access to core productivity and collaboration tools. However, many organizations are realizing that without an additional email security layer, they are much more vulnerable to targeted attacks as well data leakage and compliance challenges.

Trustwave Secure Email Gateway (SEG) Cloud TM helps you protect Office 365 with complete coverage for advanced security, archiving, data protection, encryption, eDiscovery, backup/recovery, reporting and other critical email requirements.

Protect Your Office 365 Investment

Trustwave SEG Cloud builds upon the basic security protections in Office 365. Incoming email is scanned in Trustwave's secure cloud before it reaches Office 365. Email coming out of Office 365 is analyzed to ensure acceptable use and any other regulatory compliance requirements are met. Web-based management controls along with granular auditing capabilities help you reduce business costs, complexity and uncertainty while delivering advanced protection against modern threats, unmatched policy configuration and in-depth data security and compliance management

SECURITY AREA	TRUSTWAVE SECURE EMAIL GATEWAY CLOUD
Spam Detection & False Positive Rate	99.9% spam detection rate and the lowest possible false positive rate, as verified by Virus Bulletin, an independent testing organization.
BEC Fraud Detection	Trustwave SEG Cloud goes beyond Office 365's traditional anti-spam technologies to protect against spoofing, phishing, CEO fraud and other forms of Business Email Compromise (BEC) from an industry leader. Our multi-layered approach is backed by our elite security research team, SpiderLabs® threat intelligence to detect and block targeted attacks before they reach users' inboxes.
Malicious Spam Detection	Avoid the need to go to the most expensive Office 365 enterprise tier just to get advanced threat protection. Trustwave SEG Cloud provides advanced, proactive detection capabilities and supports customizable Yara rules.
Quarantined Spam Control	Trustwave SEG Cloud has a web-based spam quarantine management tool that allows users to manage only appropriate quarantined spam and their own white and black lists in their own native language with support for Unicode.

SECURITY AREA	TRUSTWAVE SECURE EMAIL GATEWAY CLOUD
Advanced Policy Capabilities	If your email system is like many organizations' environments, you probably have years of ever-increasing mail handling rules built into your legacy on-premise solution. Re-creating these policies in Office 365 may not only be time-consuming but it may not be possible in Microsoft's policy engine. Built upon intelligence from Trustwave SpiderLabs email security research team, Trustwave SEG Cloud's robust policy engine comes with pre-built rule sets covering all domains under security, spam detection, acceptable use, data loss prevention and more. We do the research, scripting and testing so that you can quickly enable or disable rules with a simple checkbox.
Data Loss Prevention (DLP)	Trustwave SEG Cloud provides full DLP level inspection on inbound and outbound emails and attachments. SEG Cloud recognizes the true file type (regardless of the file name extension) for more than 400 types of files. It fully unpacks each file and allows you to string multiple rules together for more accurate identification of protected content. If advanced eDiscovery support is needed, you may have to purchase expensive O365 licensing tiers. On top of that, you continue paying for former users' mailboxes just to make them searchable. Trustwave's cloud-based email archiving add-on can future-proof your investment, provide improved functionality and it complies with most compliance and data sovereignty rules. This includes EU GDPR, HIPAA, PCI and more.
Email Archiving	If advanced eDiscovery support is needed, you may have to purchase expensive O365 licensing tiers. On top of that, you continue paying for former users' mailboxes just to make them searchable. Trustwave's cloud-based email archiving add-on can future-proof your investment, provide improved functionality and it complies with most compliance and data sovereignty rules. This includes EU GDPR, HIPAA, PCI and more.
Integration with Azure Rights Management Services	Trustwave SEG is the only email gateway product on the market that integrates with Azure RMS. Our solution: • Unpacks and decrypts attachments • Scans content and strips out sensitive data and violations of acceptable use policies • Re-encrypts the attachment Without visibility into RMS-protected attachments, you run the risk of sensitive data leaking from the organization.
Reporting	Trustwave SEG goes far beyond the transactional reporting capability in Office 365. Our robust reporting engine provides deep visibility into rule triggers, threats, impersonation attempts and more.
Optimized Licensing Costs	Trustwave SEG Cloud delivers best of breed email protection and reduces total cost of ownership. We can help you right-size your Microsoft investment so that you can avoid paying more for an expensive licensing package solely for advanced email protection benefits.

Get the advanced security, data protection and flexible management capabilities you require to keep your business resilient and compliant. Trustwave offers a favorable licensing model to help you reduce per-user costs and right-size your Office 365 investment.
