Business leaders are putting more pressure on a cloud-first strategy, but management of security and compliance hasn’t kept up. With multi-cloud environments becoming the norm, effectively managing security becomes a massive burden. The job of the security operations team becomes tenfold more difficult.

The top two security headaches SOCs are struggling with are compliance and lack of visibility into infrastructure security. Setting consistent security policies across cloud and on-premises environments and the continuing lack of qualified security staff are of concern too. The 2019 Gartner report, *Innovation Insight for Cloud Security Posture Management*, indicates “Nearly all successful attacks on cloud services are the result of customer misconfiguration, mismanagement and mistakes...Through 2023, at least 99% of cloud security failures will be the customer’s fault.”

Security leaders need a team of experts to help them advance cloud security posture management.

**Trustwave Services and Palo Alto Networks Prisma Cloud**

Trustwave’s suite of Managed Security Services and Consulting Professional Services leverage Prisma Cloud to effectively manage and monitor our client’s workloads across a multi-cloud environment through:

- Creating proper policy baseline across all workloads
- Providing visibility to public cloud assets and compliance posture with client policies
- Management of public cloud configurations and settings
- Enforcing consistent governance and compliance across multi-cloud environments and providing remediation recommendations
- Threat detection and investigation across all cloud accounts and correlation with other telemetry from the client’s environment with defined SLAs
- Ongoing policy checks on a recurring basis to tighten up security and compliance posture
- Ongoing reviews with client on compliance reports and policy development

**Benefits**

- Leverage Trustwave Consulting and Professional Services to build and maintain effective security governance across a multi-cloud environment
- Policy management and threat detection across all cloud workloads
- Stop threats from penetrating a multi-cloud environment and exfiltrating data
- Leverage Trustwave SpiderLabs global threat intelligence

**Information Security Advisor (ISA)** - A Trustwave Information Security Advisor is a trusted advisor who can build a full cloud security posture program for clients. An ISA can also provide an ongoing review of compliance and policy reports and help clients maintain consistent posture by helping to develop new policies based on business needs and changes.

Trustwave Fusion Platform

Trustwave Fusion is a cloud-based cybersecurity platform that serves as the foundation for Trustwave managed security services. It protects assets in any environment or mix of environments including on-premises, public clouds, private clouds and new security-focused clouds hosted by technology vendors. The platform offers a single view of threats, technology management, vulnerabilities and perceived risks across an organization’s entire environment. Through the platform, organizations benefit from actionable threat intelligence derived from the global network of Trustwave Security Operation Centers and the Trustwave SpiderLabs Fusion Center, a leading-edge security command center.

About Trustwave

Trustwave is a leading cybersecurity and managed security services provider that helps businesses fight cybercrime, protect data and reduce security risk. Offering a comprehensive portfolio of managed security services, consulting and professional services, and data protection technology, Trustwave helps businesses embrace digital transformation securely. Trustwave is a Singtel company and the global security arm of Singtel, Optus and NCS, with customers in 96 countries. For more information about Trustwave, visit www.trustwave.com.

About Palo Alto Networks

We are the global cybersecurity leader, known for always challenging the security status quo. Our mission is to protect our way of life in the digital age by preventing successful cyberattacks. This has given us the privilege of safely enabling tens of thousands of organizations and their customers. Our pioneering Security Operating Platform emboldens their digital transformation with continuous innovation that seizes the latest breakthroughs in security, automation, and analytics. By delivering a true platform and empowering a growing ecosystem of change-makers like us, we provide highly effective and innovative cybersecurity across clouds, networks, and mobile devices.
